

# WEB DEVELOPMENT INTERNSHIP PROJECT 1

## Project Title: Personal Bucket List

### Objective:

Create a visually engaging and responsive webpage that showcases a user's personal bucket list. This project will help you practice core web development concepts while developing an eye for design and layout.

## Project Details

### 1. Styled Lists

- Use unordered or ordered lists to display bucket list items.
- Incorporate decorative icons (e.g., stars or check-marks) to represent completed tasks.

### 2. Visual Design

- Focus on creating a clean and appealing layout.
- Use colors, fonts, and spacing effectively to enhance user experience.

### 3. Responsive Design

- Ensure the web-page is fully responsive and functions seamlessly on both desktop and mobile devices.
- Use **CSS media queries** to adapt the design for various screen sizes.

## Tips for Success

- **Typography & Spacing:** Choose appropriate fonts and ensure proper spacing for readability.
- **Alignment:** Utilize **CSS Flexbox** or **CSS Grid** for aligning elements effectively.
- **Consistent Color Scheme:** Select a cohesive color palette that complements the theme of the webpage.
- **Responsive Testing:** Test your design on multiple devices to ensure a flawless user experience.

## Learning Outcomes

By completing this project, you will:

1. Develop skills in HTML and CSS.
2. Gain hands-on experience with **list styling**.
3. Understand the principles of **responsive web design**.

This project serves as the foundation for more complex and exciting tasks ahead.

## Bonus Challenge (Optional)

- Add interactive **hover effects** for list items (e.g., color change or subtle animations).
- Design unique **header and footer** sections to make the webpage more professional.
